Gentleman of the United States Congress, The Federal Communication Commission,
and to whom it may concern.

This is to advise you as a subscriber of XM Satellite Radio I am really disappointed in the NAB or also known as the National Association of Broadcasters. As a last pull for a straw as it sinks the NAB has stooped to an all time low and is requesting to You Gentleman to pass or block XM Satellite Radio from brocasting highly needed and very useful broadcasts of weather and delays along with other pertant information that cars and especially for the Trucking industry needs and relies upon.

Its really a crying shame that it has come to this but it has gentlemen. I respectfully request that you make a sound decision that is just and fair for the radio public of both local and Satellite radio and pass no laws preventing the public from getting the much needed emergency information that we rely upon, Let XM Satellite Radio continue to serve its listeners with the High Programming it has provided to me and over a million and seven houndred thousand others thus fare.

Respectfully Yours,

Roy O. Wicker
Liberty, NC
